

Woodland Inventory Report  
Dennis and Alice Faye Looper Property  
Dry Hollow Area  
Overton County, Tennessee

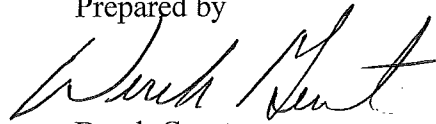

This report was prepared to determine the present estimated sawtimber board foot volume on a tract of land located in Overton County, Tennessee. The field work was completed August 19, 2022.

A series of systematically spaced plots were sampled throughout the tracts and all sound merchantable hardwood trees 12 inches D.B.H. and larger were measured and tallied. Board foot volume was computed using the Doyle Log Rule (Form Class 80). The following table list the present estimated board foot volume by species.

<u>Species</u>	<u>Estimated Bd. Ft.</u> <u>Volume, Doyle Log Rule</u>
Hickory	94,800 Bd. Ft.
Poplar	86,700
Hard Maple	39,800
Soft Maple	31,600
Red Oak	31,400
White Oak	21,100
Chestnut Oak	14,200
Beech	12,900
Cherry	9,400
Ash	3,500
Walnut	3,200
Misc. Species ( Black Gum, Sycamore, etc.)	<u>21,900</u>
Total	370,500 Bd. Ft.

This inventory was based upon 70 acres of woodland with an average board foot volume of 5,293 bd. ft. per acre. In the event the wooded acreage is either less or more than 70 acres then the total board foot volume would also be either less or more than the above total.

Prepared by

A handwritten signature in black ink, appearing to read "Derek Gernt". The signature is fluid and cursive, with the first name "Derek" and last name "Gernt" clearly distinguishable.
